- It was 3 month training during which I gained hands on experience on Dot Net Full Stack Development on C#,ASP.NET,MVC,HTML, CSS, Bootstrap, Javascript, SQL, Azure. During this period I have done 2 projects on ASP.NET ,MVC , SQL.

Associate Software Engineer

DXC Technology Bangalore

10/2020 - 01/2022

Achievements/Tasks

- After Joining the project in DXC I have been working on MES Wonderware Application.
- Participated in the App-a-thon competition in DXC and completed project on Dot net MVC and Azure pipeline.

Software Engineer

In Time Tec

02/2022 - Present

Achievements/Tasks

- Working On Dot net Core project,asp.net

EDUCATION

Bachelor of Engineering

University B D T College of engineering/Davanagere

08/2016 - 08/2020

Higher Secondary

RVSR PU College Navanagar/Karatagi

06/2014 - 05/2016

Secondary Education

Little Hearts School/Gangavathi

03/2013 - 03/2014

SKILLS

C

SQL

ASP.NET MVC

ASP.NET

Dot net core

CSS

HTML

Angular basics

Machine Learning(ML)

PERSONAL PROJECTS

Mr.Simplifier (06/2021 - 08/2021)

We have developed the application for roaster to enter the shift details and convert to excel sheet and sent it to email. And also user can see the assignments ,tasks assigned to him. Manager or team lead can assign task to the members and they can view it .

Flight Management System (10/2020 - 12/2020)

In this project we have made two panels customer and admin. Customer can register, login and check the flights available details and they can book and download the ticket. Admin can add, schedule the flights ,edit, delete can be done.

Guessing a Number (01/2021 - 12/2021)

We have a developed a application using Javascript, HTML, CSS. The user has to guess a number according to that score and highscore will be credited .

CERTIFICATES

DXC Collaborators Award (06/2021)

AZ-900 certificate from Microsoft (09/2021)

DXC Q2 FY22 Champ Award(04/2022)

WORKSHOPS

Cancer Patients Predetection

Based on Machine Learning we have predicted the cancer patients using artificial neural network(ANN),K-Nearest Algorithm(KNN),Support Vector Machine(SVM).

Movie Recommendation System

We have developed a project movie recommendation system based on machine learning using KNN supervised machine learning algorithm and Matrix Factorization. We have done using Content based filtering and Collaborative based filtering.
